

This is to inform you that medicines are prescribed (by our great doctors) by brand name and not by the generics (ingredients). Hence we end up paying more money for the same medicine.

Follow these few steps to know more and start saving on your medical bills. Refer to the attached screen shots.

1. Log on to <http://www.medguideindia.com/>
2. Click on 'Drugs'
3. Click on 'Brand'
4. Type the brand name which you are using (e.g. metocard XL 50 mg). The site will also help you with drop down menu and click on 'Search'
5. Click on 'Generics'. It will display the ingredients of the tablet.
6. Click on 'matched brands'.
7. Don't be surprised to see that same drug is available at very low cost also. And that to by other reputed manufacturer. E.g. Metocard XL 50 is for Rs.62.0 and same drug by Cipla (Meplo) is available only @ 7.00 only.

If you are convinced with the result, do forward this message to your near and dear ones.
